## LEADERSHIP

### **Founding Director, Global Infectious Disease Intelligence Consortium, University of Georgia (2020 – present)**

The Global Infectious Disease Intelligence Consortium (GIDIC) is a consortium of research institutions and partners that seeks to help stakeholders prepare for and respond to emerging disease threats before they cause widespread disruptions. Duties of the Director include budget development, fundraising, operations, and programming. Key activities of GIDIC include periodic and special reports about research advances, ongoing infectious disease outbreaks, and emerging threats; topical roundtables; informational webinars; a biennial symposium on infectious disease trends; and contracted translational research.

### **Associate Dean for Academic Affairs, Odum School of Ecology, University of Georgia (2017 – 2021)**

The Associate Dean of Academic Affairs oversees the academic activities of approximately 35 faculty, 75 graduate students, and 160 undergraduates in the Odum School of Ecology (OSE). Duties include strategic planning, oversight of curricular programs, faculty recruitment and appointment, budget development and service as OSE's primary liaison with the Office of the Vice President of Instruction and the Office of International Education.

### **Founding Director, Center for the Ecology of Infectious Diseases, University of Georgia (2016 – present)**

The Center for the Ecology of Infectious Diseases (CEID) is a research unit comprising approximately 100 faculty, postdoctoral associates, student researchers, and staff. The CEID coordinates research activities focused on cross-disciplinary understanding of the biology of infectious diseases at multiple scales with diverse scientific and scholarly methodologies. Duties of the Director include budget development, fundraising, operations, and programming. Key activities of the CEID

include facilitating team research, a regular seminar series, design and delivery of workshops and computational clinics, administration of a postdoctoral fellowship program, publication of a book series in collaboration with Oxford University Press, and planning and execution of academic events and symposia.

**Founding Director, Population Biology of Infectious Diseases REU Site, University of Georgia (2012 – 2020)**

The Population Biology of Infectious Diseases REU Site is an NSF- and NIH-funded nine-week immersive program for undergraduate training in research. The primary goals of the REU program are to promote inclusion, prepare students for graduate school, and train students for research integrating quantitative, data-driven methodology and empirical study. The Director is responsible for securing funding, arranging student housing, selection of student participants, program delivery, collection of data on student outcomes, and reporting to sponsors.
